
ICP before and after positioning the CORA in the eye. ICP was measured using the ICM (Cambridge Instruments) monitor and the CORA simultaneously. Twenty-eight patients were studied and there was a weak correlation between the ICP measured with the ICM and the CORA ($r = 0.534$, $P = 0.01$). A much greater correlation was observed between the two methods when the correlation was limited to periods of extreme ICP. Correlation improved to $r = 0.877$ ($P < 0.001$).

ArrayList in Java I'm new in Java and I've just discovered that an ArrayList is a list with fixed size, whereas a Vector (in Java 5) is a list with dynamic size. I've been reading the documentation, and I found an other property: an array is a list of elements (like an array) Ok, now I'm confused, because I always thought that Java 5 will use the same concepts as Java 1.3. I'm going to change this question, because I'm not able to use Java 1.3 (it's prohibited in my work). A: The answer to your question is easy. All you need to do is understand that an ArrayList is a list with fixed size a Vector is a list with dynamic size (technically it can have any size) a list in Java 1.3 was also called an ArrayList This is why when you talk about a 77a5ca646e
