"Yonc is a utility to connect your desktop with the internet using your dial-up line. It was designed to fill the need for an easy to use tool to help you connect to the Internet. After years of use in The Netherlands and the UK, the program was originally written for the Dutch dial up community, but now the program is available in English. ☑ Connects to the Internet in just a few clicks Just a few clicks are needed to connect to the internet. Once the connection is established, a clear display of the available servers, programs and web sites. ☑ Easy to use and reliable Yonc provides an easy to use interface. The menu icons and a well organized toolbar make it very easy to use. Yonc also provides a very reliable connection. In addition, it is compatible with Windows, Mac OS X and Linux. ☑ Lots of options Yonc provides lots of options to monitor your connection and find out what the internet is like for you. The program comes with a lot of useful options like enabling you to connect with your ISP's fast line, enabling you to connect only when your system is idle, preventing your ISP from disconnecting you after some time and the option to keep your ISP connection even if the speed of the connection is slow. ☑ Synchronize your time To keep your time on your PC synchronized with your time on your phone, choose "Watch Internet Time". With this option you will have the local time on your computer and your mobile phone. This makes it very easy to compare the time between your two computers." Dinero may not be that useful if you have a static IP address that is shared with lots of people, and is likely to change on a periodic basis. If it has to ask your password every time you connect, you can get pretty tired of it pretty quickly. While it is still free, but it costs money to upgrade to Dinero Pro. But it's worth it. Dinero describes itself as "Dinero is the worlds leading online money transfer system. Dinero makes it fast, secure, and easy for anyone to send money internationally with just a few clicks." It's easy to use, and you can create a free account that lets you do: ☑ Deposit funds ☑ Withdraw funds ☑ Transfer funds to a client ☑ Send money anywhere in the world. ☑ Get receipts

What's New In Yonc?

Yonc is a useful and reliable utility which assists you with dial up connections to the internet. The program allows you to connect to the internet via Windows dial up networking with a single mouse click, it reials if you do not get a connection on the first try, it can redial if you are connected at an unacceptable speed and it can keep you online.
