SweetIM is a free and open-source code that enables the integration of animated symbols in your pages. You can display messages in any of your website's content using this plugin. The plugin allows you to use a set of 20 symbols to show how you feel or to express yourself by adding a few special visual

effects on your pages. Thus, you can easily use the icons and the emoticons to add a few more emotions to your website. If you are interested in creating some special visual effects on your webpages, SweetIM offers you an easy way to integrate your pages' content with a few mouse clicks. To do this, you just need to add the code to your web pages and get the source code for the tool. You can customize the set of symbols that can be displayed on your webpages by adding a few settings that you can change in the settings section of the plugin. It will take a few minutes to adjust the settings in order to get the appropriate set of animations.

How to use SweetIM for Facebook: Installing the tool is really easy. Just follow the steps that are listed in the installation instructions that come with the tool. You can also follow the video tutorial that is available online. The tool comes with a set of 20 special symbols and each icon can be used to express the emotions that you feel during certain situations. For example, you can add a heart to show the happiness of a person in love or a smile to show that you are happy. The icons can be displayed in the chat window, news articles and you can even add them in your Facebook profile or your WordPress blog. The animated symbols

are useful to express how you feel when you want to let your friends or the entire world know what you are going through. To share a symbol from the set, click on the symbol that you want to use and paste the URL of the image. The code should look similar to this: To use this animated icon, just copy the code and add it in the right place on your web pages. Thus, the plugin enables you to easily create a variety of interesting content for your users by using this tool. You can also customize the set of symbols that you want to use. However, there are a few limitations to this feature that will be covered later. SweetIM for Facebook FAQ: SweetIM

SweetIM for Facebook is a browser add-on that enhances the functionality of the Facebook website. The extension intends to make the chat experience more colorful by adding emoticon support and other features. The program completely integrates in the Facebook interface and provides access to emoticons and animations by using the new buttons from the chat and the comments field. The chat window implementation provides access to a few of the hidden emoticons and allows you to Nudge the chat window in order to get your friend's attention. Another

chat enhancement is the ability to insert symbols such as check marks, arrows or hearts. It can help you express opinions and emotions by enriching the content that can be sent through the Facebook chat messages. The comment area provides you with a few extra options when you post messages on your friend's photos or on news articles. Thus, you can add animations and sound effects to all the messages posted for a certain item. Some webpages prevent you from using the animations and the sound effects but we had no problem in adding emoticons or symbols in comment boxes. Unfortunately, the extension does not

support the link sharing boxes that only allow you to send plain text to your Facebook profile. Overall, the SweetIM for Facebook extension enables you to enrich the content that you send to your friends over chat messages or comments. It is a useful tool for all the users that frequently use the Facebook social network. Free Download at Softonic: Purchase: ?
