Q: What happened to the Mac mini's iSight camera? Some how I seem to recall having an iSight camera that worked for any video purposes. Now I am on a new mac mini. The iSight camera seems to be gone from the motherboard. I can still take photos but videos are just noise. How to get it working for video? Is it some kind of bug that the camera was not present at first?

A: I've found a way to make them work. I just need to install the drivers. This can be done by downloading a drivers package from this site. The required drivers version should be version 2.0 (I used v2.0).

Moonlight Flute (from title) This game is basically just of a battle system where you combine support on your own party of characters. The main combat system here is its up to the player to set up and switch their ability of attack and magic. The game is pretty simple, once you get your basic knowledge of setting up the battle system then you should be fine. Unfortunately, this game was just pretty irritating when you have to use 2 to 3 different attacks on the same turn. (hence why I gave it a 5 out of 10). The game as a whole is more of just a really basic RPG. You have no real plot to speak of. you basically meet character after character who's in a fight with a bunch of baddies and the baddies just keep getting bigger. It's all pretty simple really. The graphics are pretty good but

the game is pretty choppy. The music is great and at times I do like listening to the music of this game. However, a lot of the music is so loud you can literally hear it clearly from a distance. (hence why I gave it a 4 out of 10). There is no voice acting or even any dialogue. The options in this game are either the smart phone interface for things like spells, skills, boosts, buffs, etc. or the maps via using your smartphone which are pretty limited to use. The whole game is more of a RPG than a fighter... This game is basically just of a battle system where you combine support on your own party of characters. ## **What's new in Elden Ring:**

Breaking News Schiavo may not be a Star Trek geek Rest of the world can learn a lot from the way in which I made my girlfriend visit the Enterprise... It was just a matter of time before I dragged a woman who wasn't wearing heels all the way onto the Starship Enterprise to save Ilsa (Natalie Wood from "The Time Machine"). I've checked every list of high-fidelity shiz, and this was the perfect way for her to experience the Enterprise space opera. Natalie experienced the Enterprise at the height of splendor, basically just after the Borg invaded. She was chased by a Borg ship and Starfleet Mark II, and I love it. I had her start her journey on the Enterprise, descended into the delta of the Great Barrier with the Captain Kirk, Spock, McCoy and the Excelsior's crew, and then it was all downhill from there. A cheesy metal band (I'm still proud of that bit, BTW) named B-20 packed it in for the afternoon, and we plucked A. Kirk from his command chair, handed him a cup of Slim Jims and a giant Twinkie and let him watch as Ilsa, with Spock's help, finally free the trapped Lorelei from the probe the Borg use to learn all of their keywords. It was a great moment. After I brought her to the bridge, she seemed like a bit of a child. I let her look at the "alien aesthetic" of the vessel, and there she was, licking her lips like a digital cat. I let her tour the bridge and experience the magnetic boots, and then I took her to La Serenissima. We had brunch, and I told her about the no-shirt policy and why I enjoy it so much, and then we took a nap together in my dad's bed. It was a magical experience that I will treasure forever. And, if you've ever been asked to "be here now" but wanted so badly to see the future, you too can experience the magic of being on the Enterprise. Every one of the Enterprise's ships (and there are, like, 40 of them) has this program called "Destination Star Trek." It's like the equivalent of setting up a private Netflix account that only you can see, except this account will let
